

CHEVRON NIGERIA LIMITED

R. C. 6135

OPERATOR OF THE NNPCL/CHEVRON JOINT VENTURE

TENDER OPPORTUNITY

PROVISION OF OFFSHORE PIPELAY AND HEAVY LIFT INSTALLATION SUPPORT (OPHL)

NipeX Tender No – CNL.00000259

1. INTRODUCTION:

Chevron Nigeria Limited invites interested and prequalified companies with relevant experience for this tender opportunity for provision of Offshore Pipelay and Heavy Lift Installation Support services to support CNL's production Activities. Offshore Pipelay and Heavy Lift Installation Support services are required to execute Company's wide range of operational activities within the Escravos Operations (western, central, and eastern) field locations for terminal, offshore, onshore and/or swamp facilities (or at other locations) as may be required to support Company's ongoing oil and gas production activities.

The services are estimated to commence fourth quarter of 2023 for Three (3) years primary term with an optional one (1) year extension period.

2. SCOPE OF WORK:

The scope of work for the services shall include but not limited to the provision of skilled, qualified and certified personnel, supervision, services, transport, testing devices, equipment, tools, consumable materials and/or every item of expense necessary for the rendering Offshore Pipelay and Heavy Lift Installation Support Services to Company, 24 hours per day, 7 days per week, on an "as and when required" basis and in a safe manner to plant, assets and personnel at all Company's facility locations (Escravos, offshore, onshore, etc). Furthermore, successful companies would be expected to have self-sustaining operations and capabilities to provide any aspect of the scope from personnel only who are qualified and able to communicate fluently in English, to full services, including equipment and consumables, as may be required.

Detailed Services Description:

The scope of work for the Offshore Pipelay and Heavy Lift Installation Support Services includes but not limited to the following:

- v Engineering design, dive, geotechnical and geophysical survey, procurement (except COMPANY supplied materials), project management, safety management, security management, community affairs management, fabrication (including coating), transportation, offshore installation and commissioning of pipelines, flowlines, including well platform pipeline risers to manifold tie-in spools, and offshore structures for COMPANY offshore fields and submission of as-built documentations to COMPANY.
- v Engineering design, dive, geotechnical and geophysical survey, procurement (except COMPANY supplied materials), project management, safety management, security management, community affairs management, fabrication (including coating), transportation, offshore installation and commissioning of pipelines, flowlines, including well platform pipeline risers to manifold tie-in spools, and offshore structures for COMPANY offshore fields and submission of as-built documentations to COMPANY.
- v Provision of proven, in-country offshore pipe-lay and heavy-lift barges capable of carrying out extended pipe-lay work and offshore structures installation through a weather-friendly window. Typical pipeline diameter will range from 4" to 42". Water depths will range from 10ft to 200ft in COMPANY Offshore Fields. Typical offshore structures weighing from 10 MT to over 600MT requiring load-out, transportation and installation in offshore fields.
- v Provision of sufficient infrastructure and personnel to support all project management activities related to the delivery of engineering, diving, survey, procurement, and offshore construction services for the duration of the contract.
- v Load-out, (including design and selection of rigging and lifting gears, lifting aids, grillages, ballasting as required and all sea fastening activities) Transportation and Installation of various Offshore Structures as shown below.
