

NIGERIAN AGIP OIL COMPANY LIMITED
Operator of the NNPC/NAOC/OANDO Joint Venture

TENDER OPPORTUNITY:
PROVISION OF CEMENTING AND PUMPING SERVICES FOR NAOC JV LAND AND SWAMP OPERATIONS
NipeX Tender No. 1000006558

1. INTRODUCTION

The Nigerian Agip Oil Company limited (NAOC) has a requirement to issue CEMENTING AND PUMPING SERVICES contract for the Scope of Work identified below on NAOC land and swamp area wells for three (3) years firm period and two (2) one (1) year optional extensions.

NAOC therefore invites submissions for the purpose of technical evaluation from suitable and reputable companies having the capability and experience to undertake the under defined scope of work:

2. SCOPE OF WORK

The Scope of Work in object hereto is classified under eni commodity code SS05BB05 – CEMENTING (Services, Equipment and Products) and includes the underlisted, in line with the technical specifications detailed in Appendix D – Scope of Work and Technical Specifications.

1. Provide cementing services and, when required, materials and engineering support to cure lost circulation:
 - Provide Cementing and Pumping Services including but not limited to cementing conductors, casing (single or multi stage), liner squeeze, plug back jobs and all other related operations which are undertaken as part of normal Oilfield practice.
 - Provide Materials and engineering to minimise/eliminate lost circulation while drilling and cementing;
 - Perform the design, testing, mixing and pumping services including cementing services and cure lost circulation systems proposed with all items of equipment, including ancillary and optional equipment, as described in **Error! Reference source not found.** herein, in accordance with the well specifications;
 - Provide a laboratory supervisor/engineer and base manager who will liaise with Company's operational departments on requirements, planning, problems and job performance.
 - Test cement slurries and cure lost circulation systems formulations in their designated laboratory and prepare suitable recipes for the planned Work, as and when requested by Company. .
2. Prepare a complete cement work execution plan prior to each job including but not limited to tank set up, bulk transfer, mud transfer, mix water details, slurry volumes, lost circulation pills volumes, spacer volumes, required equipment, contingencies, expected pressures and pressure losses, areas of responsibility and safety measures. Provide pumping services:
 - Pump and displace all fluids (including Glycol and diesel oil) forming part of normal Oilfield practice for cementing, curing lost circulation, testing wells and well stimulation.
 - Provide miscellaneous Pumping Services including but not limited to pumping fluids on surface, pumping on blow-out wells, leak off tests, pressure tests, killing wells, circulating through stuck pipe, pumping diesel during well testing operations, pumping brine or other fluids for circulation, pressure testing rig equipment and all other similar operations which are undertaken as part of normal oilfield practice.
- Supply Chemicals/Cement Additives, Acids and Casing Accessories

Failure to meet any of these requirements shall lead to outright disqualification.

CONTRACTOR shall conform to **ISO 9000** series International Standard. All the activities shall be carried out with minimum impact on the environment and maximum care of health and safety of all concerned, directly or indirectly, with the activities.
