Our Vision

To provide an industry platform for fast, efficient and transparent supply chain transactions.

Our Mission

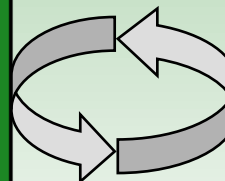

Build transaction confidence in the supply of goods and services in Nigeria's oil and gas industry by continually adapting to the needs of customers and other Stakeholders.

NipeX STATUS UPDATE AS @ APRIL 30, 2020

Supplier Status in NipeX JQS	
Total No. Of Pre-qualified Suppliers	5,939
Tender Status in NipeX	
Opportunity Phase	534
Technical Phase	700

NipeX OPERATIONS: JQS & eMARKETPLACE

The Joint Qualification System (JQS) is designed to pre-qualify Suppliers registered in Nigeria. It increases efficiency and instills integrity in the pre-qualification process of the Nigerian oil and gas industry.

The eMarketplace is a collaborative environment that delivers significant value to all Stakeholders in the contracting process through a comprehensive suite of capabilities.

THE BENEFITS OF PRODUCT CODES ADDITION

One of the stages of the pre-qualification process is the online completion of the questionnaire.

At the questionnaire stage, the supplier amongst others has to state the product codes/services he/she intends to render in the Oil and Gas industry.

Most new suppliers who register with NipeX are ignorant of the provision that every new supplier can register a maximum of twenty (20) product codes./services.

Once the questionnaire are published on the data base, the supplier cannot alter the registered product codes/services already completed on the NipeX Joint Qualification System (NJQS).

However, NipeX has a process/procedure for already pre-qualified supplier to either delete or add product codes/services to the existing pre-qualified product codes.

There are many reasons why a pre-qualified supplier may want to add to existing prequalified product codes:

- a) When a supplier identifies opportunity and is convinced that he/she has capacity and capability to execute the job or service.
- b) When a supplier develops interest in new areas of service delivery.
- c) When a pre-qualified supplier builds capacity and capability for a service over time.

Every advertised tender is allowed to run for a maximum of twenty-one (21) days. This time lag allows NipeX to conclude on any request for product codes addition. Interested pre-qualified suppliers are therefore advised to initiate the process early enough for NipeX to process any request for product code addition.

Once the Product Code Addition (PCA) request is approved, an email is sent out to the supplier to pay six hundred thousand Naira (₦600,000.00) or two thousand dollars (\$2000) through remita to NAPIMS account

The pre-qualified supplier can add maximum of five (5) codes every six (6) months.

The process is to send an email to customersupport@nipex.com.ng and attach all relevant documents including appropriate DPR permits. The documents to be attached to the mail are:

Letter of Application, DPR Permits, Work Experience, MOA/MOU and list of Equipment. Please note that the services to be rendered must be in the MERMAT.

Through product code addition, any supplier is encouraged to build capacity and capability in new areas of business interest and thereby expand scope of service delivery.

However, when registration into NipeX is not carefully done at the onset and intended prod-

Question: I am a supplier who started NipeX registration in 2017 but abandoned the process. I later resumed the registration process in 2019 and received the NipeX Audit team for the Onsite audit. In 2019 My four DPR certificates did not match any of my registered product codes.

Kindly advise.

Answer: Please do the matching of product codes with DPR permit. This will enable you select the appropriate DPR permit with your registered product codes. Thereafter apply to DPR for the relevant DPR permits.

Current Tender Advert Opportunities in NipeX System

Name of Operator	Title of Advert	Closing Date
